

PROFESSIONAL SUMMARY

- Electronics & Communication Engineering graduate skilled in building AI-powered applications with Python, FastAPI, LangChain, and the Google Gemini API. Hands-on experience developing end-to-end projects covering RAG pipelines, vector search using FAISS, REST API development, and NLP-based scoring systems. Seeking an internship or entry-level role in AI/ML or Backend Engineering to apply strong programming fundamentals and practical application development skills.

SKILLS

- Languages:** Python, SQL
- AI/ML & NLP:** LangChain, Google Gemini API, Retrieval-Augmented Generation (RAG), FAISS, Sentence Transformers, Prompt Engineering, Scikit-learn
- Backend & APIs:** FastAPI, REST API Design, JSON, Object-Oriented Programming
- Data & Frameworks:** Pandas, NumPy, Streamlit
- Database:** MySQL, SQLite
- Tools:** Git, GitHub, VS Code, Jupyter Notebook

PROJECTS

- AI-Powered Job Matching & Application Assistant**

Python, Google Gemini API, Sentence Transformers, Streamlit, SQLite, FastAPI

Sep 2026 – Present

GitHub

 - Currently developing an AI-powered job matching assistant that analyzes job descriptions against multiple resumes and identifies the best-fit resume for each role.
 - Implemented semantic similarity and skill-based matching to calculate resume-JD match scores and identify matched and missing technical skills.
 - Integrated the Google Gemini API to generate tailored, resume-grounded cover letters based on job requirements and the selected resume.
 - Built an agent-based workflow for job search, resume selection, match evaluation, recommendation generation, and application-status tracking with human approval.
 - Developed a Streamlit dashboard and SQLite-based storage to manage job recommendations, match scores, selected resumes, and application workflow status.
 - Gaining hands-on experience in AI agents, LLM integration, prompt engineering, semantic matching, API development, workflow automation, and human-in-the-loop AI systems.
- Intelligent Document Search & Question Answering System**

Python, FastAPI, LangChain, Google Gemini API, FAISS, Streamlit

Apr 2026 – May 2026

GitHub

 - Developed an AI-powered document question answering application using Python, FastAPI, LangChain, Google Gemini API, FAISS, and Streamlit.
 - Built a document ingestion pipeline to extract PDF content, split documents into semantic chunks, generate embeddings, and store them in FAISS for similarity-based retrieval.
 - Implemented a Retrieval-Augmented Generation (RAG) workflow using LangChain and Google Gemini to generate answers based on retrieved document context.
 - Developed REST APIs with FastAPI for document processing, indexing, retrieval, and question answering.
 - Integrated the FastAPI backend with a Streamlit interface, allowing users to upload documents and interact with them through natural-language questions.
 - Organized the application into modular components for document processing, retrieval, API handling, and response generation.
- Smart Resume-JD Matcher**

Python, Streamlit, Sentence Transformers, Scikit-learn, pdfplumber, NLP

Aug 2026 – Sep 2026

Live Demo

 - Built and deployed a Streamlit application that analyzes resumes against job descriptions and generates a semantic resume-JD match score.
 - Developed a PDF processing pipeline using pdfplumber to extract, clean, and normalize unstructured resume text for analysis.
 - Implemented semantic similarity using Sentence Transformers and cosine similarity to compare resume and job description content.
 - Developed a skill-gap analysis module to identify matched and missing technical skills by comparing resume and job description requirements.
 - Added role-based recommendations to improve resume alignment with specific job descriptions and organized the application into modular components for text processing, skill extraction, and scoring.

EDUCATION

- Chalapathi Institute of Engineering And Technology, Guntur**

Bachelor of Technology – Electronics & Communication Engineering

2021 – 2025

CGPA: 6.61/10.0

CERTIFICATIONS

- Meta, GenAI in Data Analytics

2025
- Infosys Springboard, Python Programming

2025
- HackerRank, SQL (Basic)

2025
- HackerRank, Python (Basic)

2025
